

TECHNICAL SHEET

CAMERA

RADIAL

DTR 65 HRC

Generalities

Principle

The logging radial camera is a tool which enables to record a video in real time of the borehole side thanks to a rotative CDD sensor located at the bottom of the probe.

Result

Direct visualization on monitor and record on numerical format + DVD. Pictures of the interesting areas.

Interest

- In cased hole: Diagnostic of the plain casing / screen casing state.
- In open hole: Caving and fractures highlighting.

Constraints / borehole

- | | | | |
|--------------------|---|---|--|
| filling up | : <input checked="" type="checkbox"/> water | <input type="checkbox"/> mud | <input checked="" type="checkbox"/> dry |
| casing | : <input checked="" type="checkbox"/> PVC | <input checked="" type="checkbox"/> steel | <input checked="" type="checkbox"/> open |
| borehole | : <input checked="" type="checkbox"/> cored | <input checked="" type="checkbox"/> destructive | |
| max. depth | : 500 m | | |
| effective diameter | : 100 to 1200 mm | | |
| temperature | : 0°C to 40°C | | |
| max. pressure | : 50 bars | | |

Technical specifications

Dimensions

- length : 1500 mm
- diameter : 65 à 191 mm
- weight : 7.1 Kg

Elements

- sensor : CCD 1/3"
- lightning : 18 white LEDs high lightning
2 proximity LEDs

Sensor specifications

- focal : 3.8 mm at F/2.0
- aiming : ± 110°
- rotation : 360°
- focus : manual (remote)

Option : Additional lighting Ø 191 mm
2 halogen bulbs (12V – 35W)

Records / Measures

Records

- Tool : centered off-centered
- Measure : down up
- Rec. speed : according to need

Measures

- Horiz. resolution. : 540 TV lines
- Vert. resolution. : variable
- Accuracy : 0,02 lux @ F/1.2

Examples
